CERTWAY

An administrator wants to create a playbook that can be manually triggered on-demand against a group of VMs simultaneously from the Prism Central Explore view.

Which trigger type should be configured during playbook creation?

- a) Time Trigger with "Action Now" selected
- b) Webhook Trigger to Prism Central API
- c) Manual Trigger for entity type VM
- d) Event Trigger for the Project Entity that contains the VM group

An administrator needs a blueprint to run on a group of HTTP service endpoints.

What should the administrator create to facilitate this?

- a) Endpoint
- b) Application
- c) Environment
- d) Tunnel

<https://Certway.website>

An administrator is configuring an environment as part of the project creation.

Which configuration item ensures that all VMs created are subject to specific policies for use in blueprints in Self-Service?

- a) Boot Configuration
- b) Categories
- c) Guest Customization
- d) Credentials

<https://Certway.website>

Which is a trigger for a playbook?

- a) Execute
- b) Webhook
- c) Create
- d) Clone

<https://Certway.website>

What task type can only be configured in a Runbook?

- a) Delay
- b) HTTP
- c) Decision
- d) Execute

<https://Certway.website>

An administrator is creating a multi-VM blueprint to deploy a highly variable application. The administrator has decided to make use of the Self-Service macros to dynamically provide the application customization at the time of deployment.

What functionality do the macros provide?

- a) They are VM templates used in Multi-VM blueprints.
- b) They provide checks upon deploying blueprints to confirm they will compile.
- c) They allow the user to access the value of variables set on entities.
- d) They create an overarching group to apply runbooks to.

An administrator has a playbook where one of the actions is **Guest Shutdown**. The playbook runs successfully on older VMs in the cluster, but it is failing on newer VMs.

What could be causing this?

- a) The newer VMs need to have NGT installed.
- b) The newer VMs do not have a snapshot.
- c) The newer VMs need to be the same OS as the older VMs.
- d) The newer VMs are referenced in a secondary playbook.

A Developer is configuring a blueprint to deploy a Windows VM. While configuring the VM, after selecting the proper network, there is no option to enter a Static IP under the NIC Configuration.

What is the cause of this?

- a) The Developer is using a Single-VM Blueprint and a Static IP can only be used in Multi-VM Blueprints.
- b) The Application Profile hasn't been fully configured yet in the Blueprint so the option won't be available.
- c) The selected network is not configured for Nutanix IPAM in Prism Central and relies on External IPAM.
- d) The Service hasn't been fully configured yet in the Blueprint so the option won't be available.

The screenshot shows the CERTWAY website interface. At the top, there's a dark blue header with the site logo, navigation links (Home, Courses, Tech News, Refund Policy, About), and a search bar. A prominent banner across the top reads "BIG SALE: Enjoy 10% discount for all materials". Below the header, there's a section for "New Exams" featuring several exam dumps for sale, including "Nutanix Certified Professional – Multicloud Infrastructure NCP-MCI 7.5 EXAM DUMP" and "Nutanix Certified Master – NCM MCI 7.5 EXAM DUMP". The website also displays a currency converter on the right side, showing USD, AED, EGP, INR, and SAR.
